

A high-angle, wide shot of a modern commercial building's interior. The space is characterized by a large, multi-paned skylight at the top, which allows natural light to filter through, creating a bright and airy atmosphere. The walls are white with horizontal ribbed textures. In the foreground, a round, light-colored wooden table with a dark, fringed runner holds a piece of driftwood. The floor is made of large, light-colored tiles. The overall design is clean, minimalist, and emphasizes natural light and materials.

Opening VELUX skylights add natural light and fresh air to the retail area at one of the world's leading lavender farms. The products present better in natural light.

Creative use of VELUX skylights can add the WOW to shopping centres.

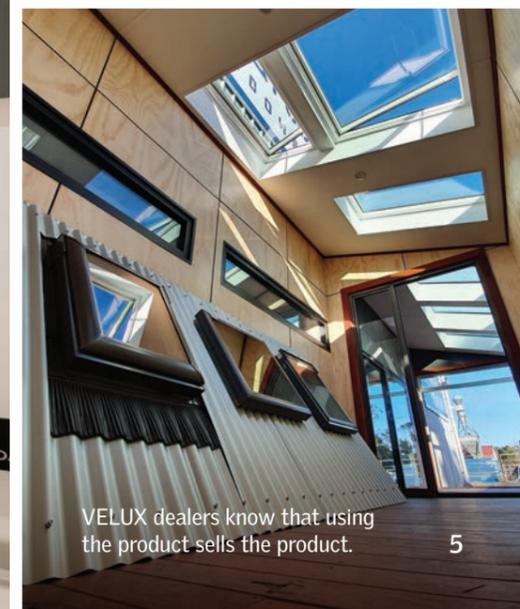

A builder uses VELUX skylights to inspire clients in the selection room. Natural light is the best light to view colours in.

Retail

VELUX skylights do a world of good for retailers. Ambience, fresh air and natural light are a winning combination for retailers wanting to create a point of difference. They save on the power bills too...

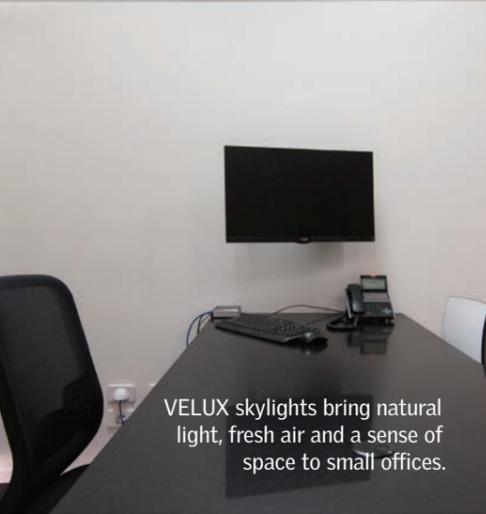

VELUX dealers know that using the product sells the product.

VELUX skylights create the WOW in office environments.

A commercial builder uses VELUX skylights as a main feature in their head office.

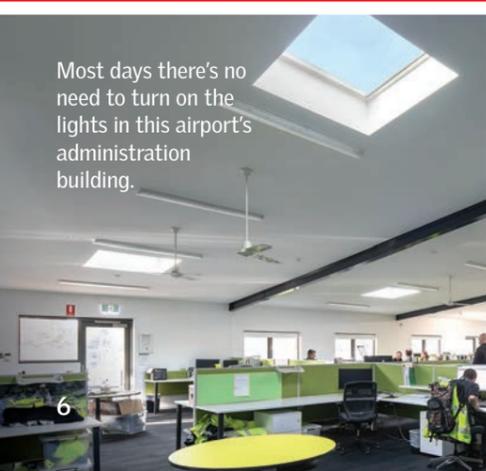

VELUX skylights bring natural light, fresh air and a sense of space to small offices.

Office
Natural light and fresh air come at a premium in most office environments, although the benefits are obvious. When staff feel better, they are more productive and have fewer days off sick. And, of course, lower power consumption is better for the environment.

Research shows that natural light boosts productivity.

Most days there's no need to turn on the lights in this airport's administration building.

VELUX®

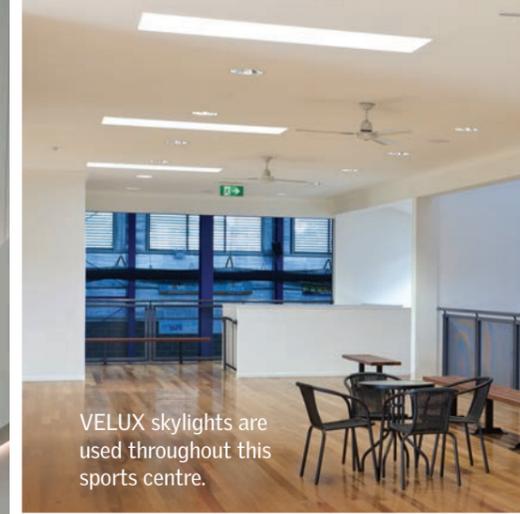

Fresh air and natural light in abundance lift spirits at a Men's Shed, a meeting place for lonely and vulnerable men.

CALYPSO BAY
RESIDENTS
LEISURE CLUB

VELUX skylights provide the WOW in this resident's leisure club.

VELUX skylights are used throughout this sports centre.

Community

The benefits of VELUX skylights in a community setting are as diverse as the settings they appear in. A sports centre saves big money on the power bill, a leisure club uses VELUX as a design feature, a Men's Shed makes clients feel good with natural light and fresh air.

Thanks to 34 VELUX skylights, this sports centre only needs artificial light at night time and on rainy days.

More than a metre of snow can fall in a single night and wind speeds can exceed 200 kph at this ski resort. VELUX skylights are made for it.

VELUX®

Hospitality

VELUX skylights are perfect for the hospitality and tourism industries. Guests who feel good are more likely to stay longer, come back another time and tell friends and family about their experience. Everybody likes fresh air and natural light...

VELUX skylights add to the ambience at a craft brewery.

Opening VELUX skylights provide light and ventilation at this popular tourist destination. No air conditioning is needed.

Passengers and staff at this regional airport have a clear view to the skies through VELUX skylights.

80 VELUX skylights bring natural light to boost creativity for students at an art school.

VELUX skylights keep temperatures down and spirits up in this warehouse.

Opening VELUX skylights with blinds control the climate in a historical building from 1904.

More

Manufacturing, warehousing, education...there are many more commercial applications for VELUX skylights. Each user has their own story but a wish to reduce power bills, increase productivity and protect the environment are common traits.

Natural light makes learning easier.

In the manufacturing industries, reduced power bills and increased productivity are key drivers for the use of VELUX skylights.

VELUX is Made for New Zealand

VELUX is the only skylight that is CodeMark® certified. You won't have to spend a second verifying that VELUX products comply with New Zealand Building Code — the CodeMark® certificate is unchallengeable and has legal status equivalent to that of an Acceptable Solution or Verification method.

VELUX skylights have literally passed every test in the book...
